### Information about the speaker

Rainer Klein studied paper technology at TU Dresden from 1974 -1978. From 1978 to 1988 he worked as scientific assistant / teaching engineer at the chair of paper technology and obtained his doctorate in 1985. In 1988 he finished a post-graduate study as specialist engineer for computer science at TU Dresden. After working one year as a computer scientist at the library of TU Dresden, he joined PTS Munich in 1990 to deal with issues of paper recycling and measurement technology. In this position, he developed the concepts for the DOMAS image analysis system and organised its software development. In 2001 R. Klein changed to PTS Heidenau.

His current work focus is on surface analysis and typographical evaluation.
